

# Game based learning *of* Sorting Algorithms

**Software Engineering Lab (CS243) Assignment**

**Spring-2017 Session**

Design Document

Instructor

Dr Samit Bhattacharya

CSE Department, IITG

*Group Number: 02*

Project Team Members

*15101003 : Abhishek Kumar*

*150101045 : Patoliya Meetkumar Krushnadas*

*150101054 : Saket Sanjay Agrawal*

## **Table of contents:**

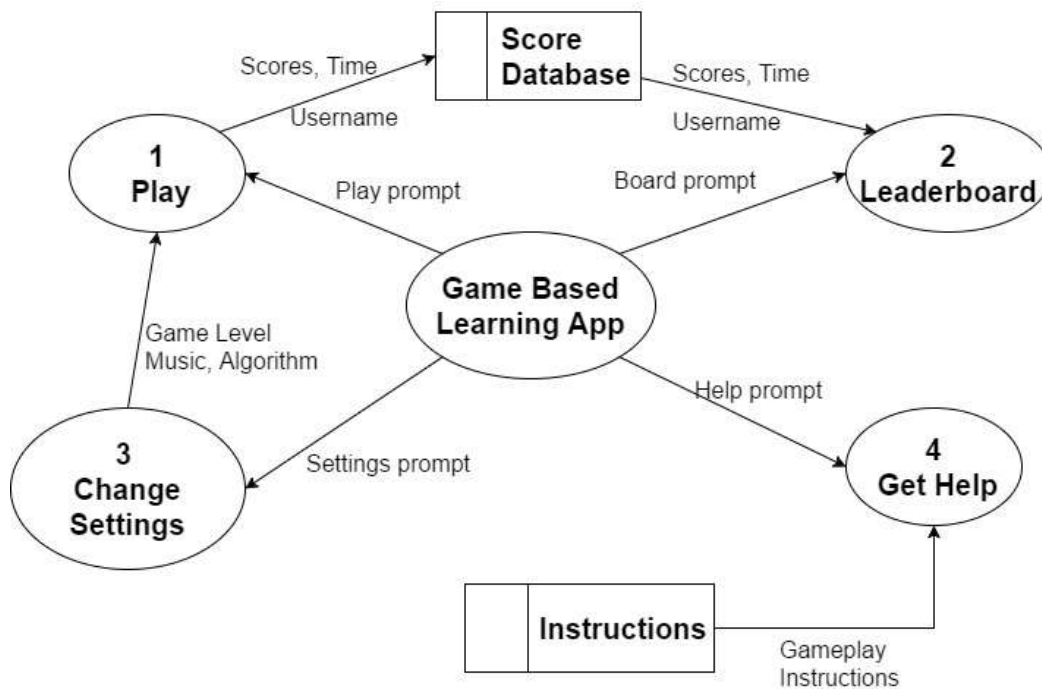

1. Data Flow Diagrams
  - 1.1. Context Level Diagram
  - 1.2. Level 1 Diagram
  - 1.3. Level 2 Diagrams
2. Process Decomposition\ Diagram
3. Data Dictionary
4. Entity Relation Diagram

# 1. Data Flow Diagrams

## 1.1 Context Level Diagram

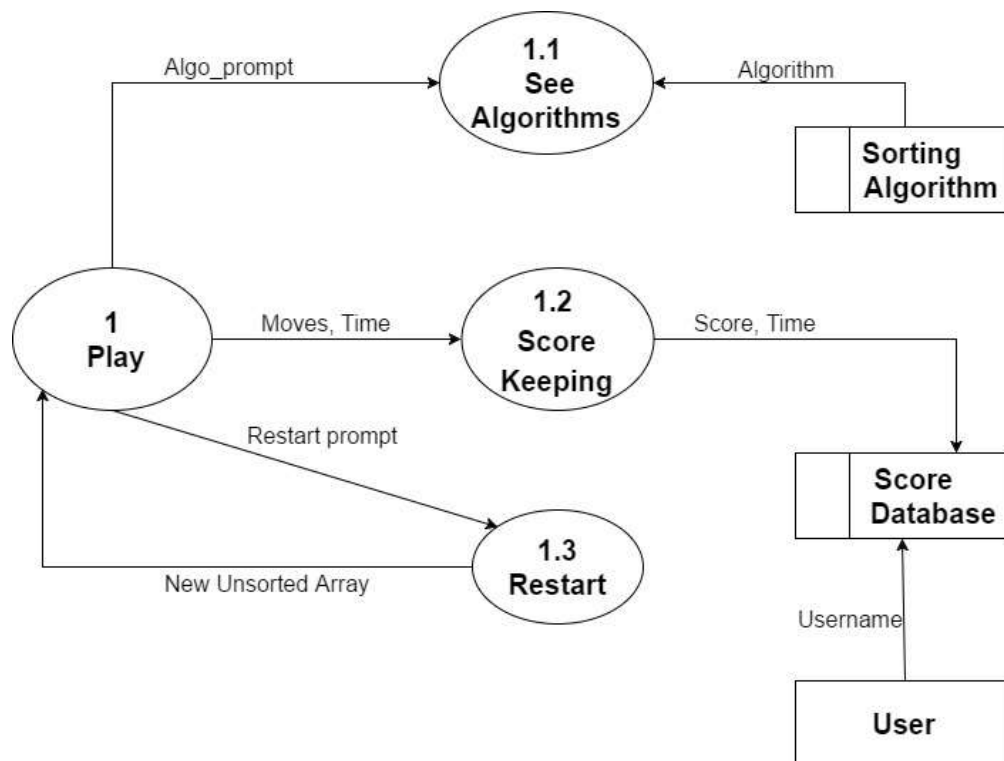

## 1.2 Level 1 Diagram

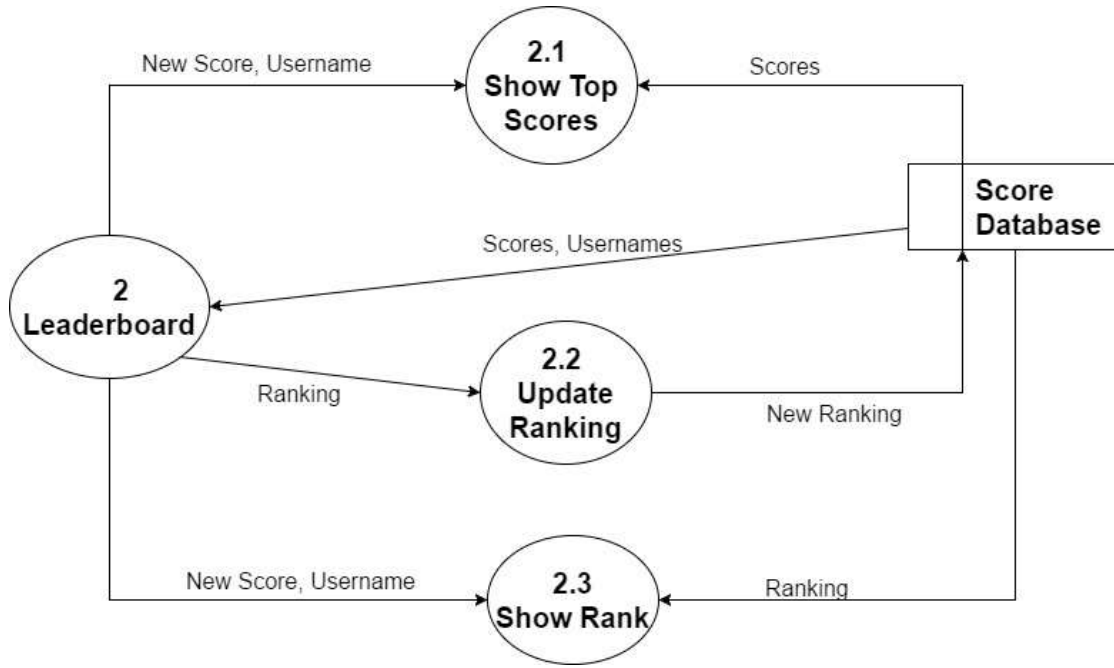

## 1.3 Level 2 Diagrams

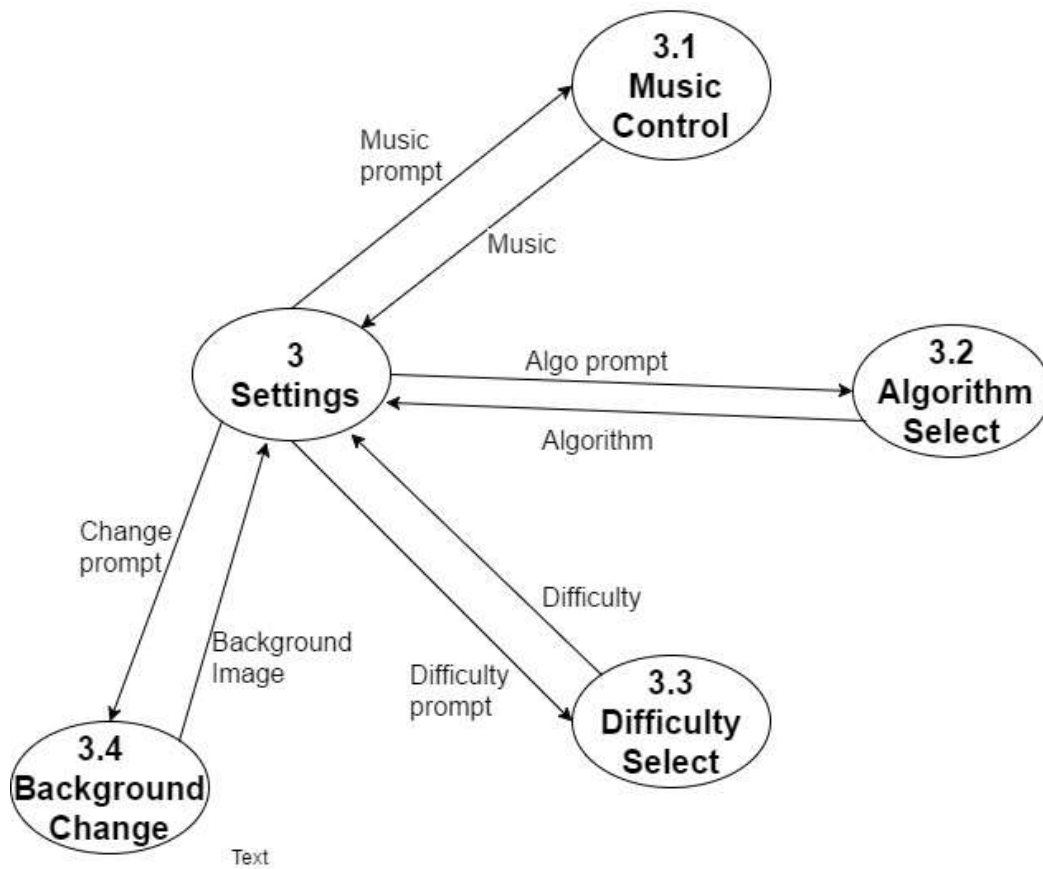

### I. Play

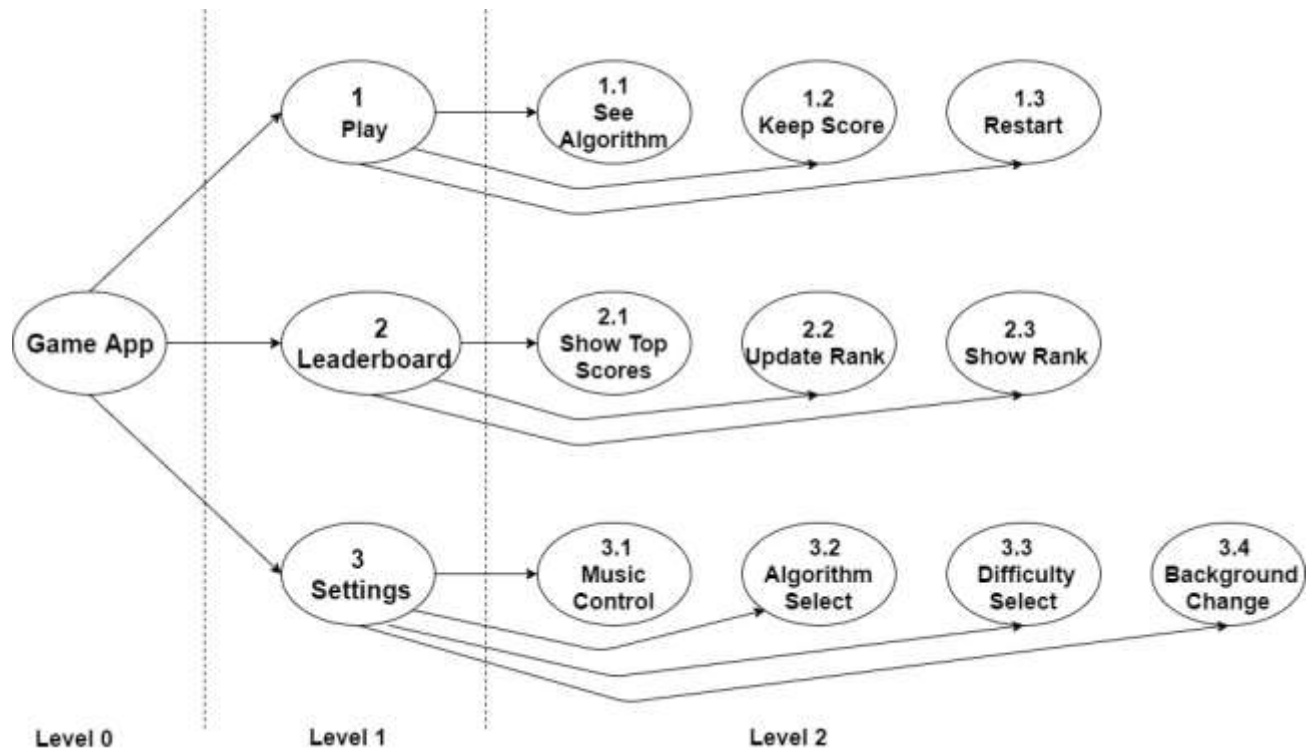

## II. Leaderboard

### III. Settings

## 2. Process Decomposition Diagram

### 3. Data Dictionary

Field Name	Data Type	Length	Description
Rank	Number	<100	Rank of the user based on score and time
Username	String	4 to 16 characters	Username entered by the user
Score	Number	<1000	Score of the user in the game
Time	Time		Time taken by the user to complete the game
Swaps	Number	<1000	No. of swaps done by the user to make the array sorted
Retries	Number	<1000	No. of times user touches the restart option

#### 4. Entity Relationship Diagram
